

ELECTRIC WIRE ROPE HOIST

SERIES VS

WHY TO SELECT **THAC** HOIST?

3-VARIABLE-SPEED HOIST

High safety

Energy Saving

Low Noise

Long Lifetime

- Low speed for exact positioning
- High speed for efficient operation
- Fast speed for enhancing performance

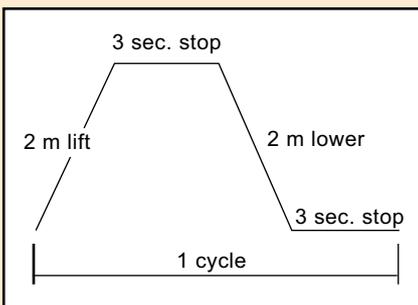

Increases your productivity & profitability

Lifting motor rating

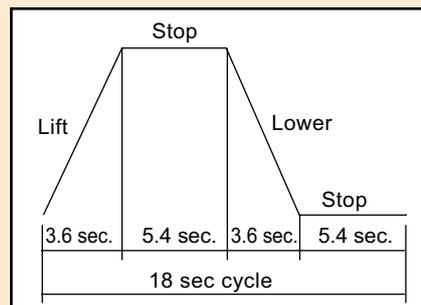

■ **Short time rating ... 30 min**
This rating indicates how long the hoist can be operated continuously on the below cycle, assuming continued operation for a short time span.

● Specified for WLL.

■ **Intermittent rating ED percent ... 40%**
■ **Max. No. of starts per hour ... 400**

This rating indicates the ED percent (ratio of motor ON-to-OFF time) and max. No. of starts per hour (how many times the motor is started up in one hour) for a hoist operated continuously on the below cycle, assuming continued operation or repeated starting over a long time span.

● Specified for 63% of WLL.

$$\bullet \text{ED}\% = \frac{\text{Motor ON time (3.6 sec. x 2)}}{1 \text{ cycle (18 sec.)}} \times 100$$

$$\bullet \text{Max. No. of starts per hour (starts/hr)} = \frac{1 \text{ hour (3600 sec)}}{1 \text{ cycle (18 sec.)}} \times 2 \text{ (lifting \& lowering)}$$

If using the hoist on a cycle different from the above, use the below formulas to calculate ED percent and the max. No. of starts per hour.

$$\bullet \text{ED}\% = \frac{\text{Total Motor ON time in one hour under the busiest conditions of use (min)}}{60 \text{ min.}} \times 100$$

$$\bullet \text{Max. No. of starts per hour (starts/hr)} = \text{No. of starts in one hour under the busiest conditions of use}$$

Construction & Features

1 HOISTING MOTOR

It's optimized motor design for low-vibration and quiet operation. Use the squirrel cage motors with cylindrical rotor for hoisting duty. Type of Protection IP54(IP55 is optional) 40%ED, F Class insulation with thermal contacts to protect against overheating (60%ED is optional).

2 HOIST GEARING

The geared unit is a 3-stage helical gearbox with high endurance gearing that the material adopts processed alloy steel SCM415 and the heat treated hardness reaches HRC60 degree , solidity, durability and high precision.

3 FAST ACTING BRAKE

The disk electromagnetic brake features automatic braking in the event of a power failure. Asbestos-free lining can reach 1,000,000 times under a normal application. (2nd Mechanical Brake is optional. Long-service and trouble-free mechanical brake provides dual braking system to ensure operational safety.)

4 LIMIT SWITCH

Automatic cuts off of the hoisting and traveling motions in upper, lower, left and right limit positions; prevent mechanical failure from over traveling of the hook.

9 OVERLOAD PROTECTION

Mechanical overload protection cuts off the power of motor to prevent object lifting in case of excessive over loading.

10 FREQUENCY INVERTER CONTROL

A frequency inverter provides variable hoisting speeds for smooth lifting and stop as well as variable cross travel for low-sway travel motions. Fast and exact positioning enhances the performance in overhead material handling. Reducing power consumption to save energy is also the benefit of frequency inverter application.

3-Variable-

Speed Hoist

5 BOTTOM BLOCK AND HOOK

The 360° swiveling hook is made of high-strength and high resistance forged steel and is fitted swiveling crossbar. The elegant bottom blocks are equipped with protective edging around the rope opening and are provided with an anti-drop safety latch.

6 ROPE

The rope is made of high fatigue-strength and wear-proof flexible steel. The minimum use coefficient is according to ISO, JIS, CNS & CMAA#70 standard

***Standard apply the high strength galvanized steel wire rope.

7 PROTECTIVE ROPE GUIDE

Made of tough plastic, the rope guide lead-in by means of hardened pressure rollers mounted on anti-friction bearing. The rope guide also reduces wear on the rope and rope drum to enhance the safety and durability.

8 PUSH BUTTON SWITCH (IP65) WITH EMS

The main line On/Off lets you cut off power by pressing a button close at hand rather than the primary power source. The advanced features of water-proof and dust-prevented meet IP65 improve its flexibility and durability. It is useful for controlling the number of hoists in operation. Emergency stop as our standard specification is the added-on safe device for our valued customers.

11 PANEL FOR ELECTRICAL CONNECTIONS

Magnet contactor is operated through push button switch or remote controller and electric parts and cable are clearly labeled for easy repair and maintenance. Control box have good water-proof, dust-proof and the enclosure meets IP54 specifications. Standard main voltages are 3Ph/380V/50Hz(60Hz) and 3Ph/415V/50Hz and standard control voltage is 48V. Other main and control voltage are also available by request.

~SPEC AS REQUEST~													DEPENDS ON MAIN HOIST	

- ※ DIMENSION : ACCORDING TO DESIGN DRAWING
- ※ OTHER SPEC. REQUIREMENT CAN BE DESIGNED

OPEN WINCH TYPE

- ※ SPECIAL APPLICATION WITH SPECIAL SPEC DEPENDS ON CUSTOMER'S REQUEST.

• **Hoist Duty Group is determined by the load spectrum and operating time**

Chart A.

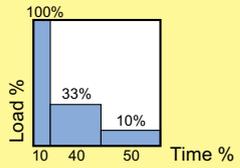

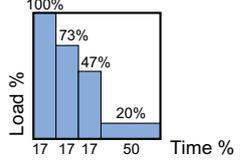

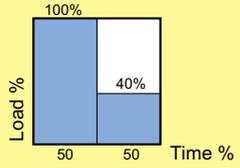

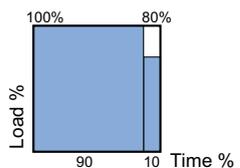

LOAD SPECTRUM		
LIGHT	Occasionally maximum loading, routinely low loading, medium dead load ($K \leq 0.5$)	
MEDIUM	More Often maximum loading, routinely low loading, medium dead load ($0.5 < K \leq 0.63$)	
HEAVY	Frequently maximum loading, routinely medium loading, large dead load ($0.63 < K \leq 0.80$)	
VERY HEAVY	Regularity maximum loading, very large dead load ($0.80 < K \leq 1$)	

Chart B.

Load Spectrum	Average operating time per day (†) [h/day]				
	$\dagger \leq 2$	$2 < \dagger \leq 4$	$4 < \dagger \leq 8$	$8 < \dagger \leq 16$	$16 < \dagger \leq 24$
LIGHT	$\dagger \leq 1$	$1 < \dagger \leq 2$	$2 < \dagger \leq 4$	$4 < \dagger \leq 8$	$8 < \dagger \leq 16$
MEDIUM	$\dagger \leq 0.5$	$0.5 < \dagger \leq 1$	$1 < \dagger \leq 2$	$2 < \dagger \leq 4$	$4 < \dagger \leq 8$
HEAVY	$\dagger \leq 0.25$	$0.25 < \dagger \leq 0.5$	$0.5 < \dagger \leq 1$	$1 < \dagger \leq 2$	$2 < \dagger \leq 4$
VERY HEAVY	$\dagger \leq 0.125$	$0.125 < \dagger \leq 0.25$	$0.25 < \dagger \leq 0.5$	$0.5 < \dagger \leq 1$	$1 < \dagger \leq 2$
Hoist Group	M3 (1Bm)	M4 (1Am)	M5 (2m)	M6 (3m)	M7 (4m)
Duty Factor	25% ED	30% ED	40% ED	50% ED	60% ED
Max, Starts / hour	≤ 150 /h	≤ 180 /h	≤ 240 /h	≤ 300 /h	≤ 360 /h

Instruction:

- Select the Load Spectrum Type in chart A. Follow that Load Spectrum line to the chart B, across the table and choose your Average Operating Time Per Day value (†) to the limits in the table. Stop where your calculated value (†) is between the limits. Move down that same column to get your Hoist Group, Duty Factor and Max. Starts / h.

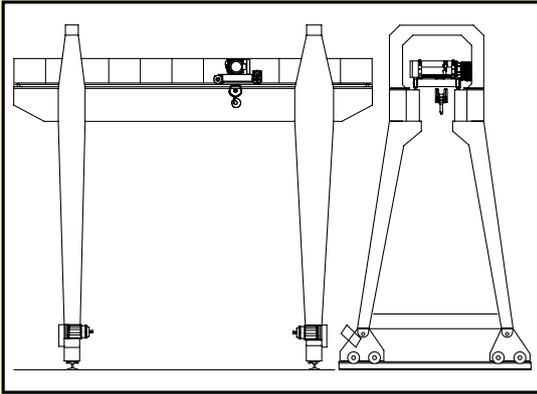

Example

- Load spectrum selection **MEDIUM** (Example).
- Average operating time per day calculation $\dagger = 3.8$ h/day.
- ⇒ Hoist Group selection **M5 (2m)**

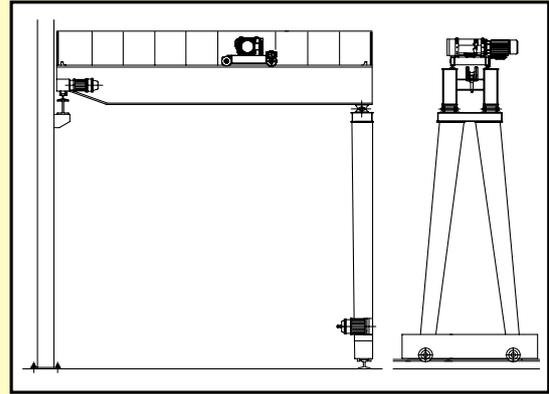

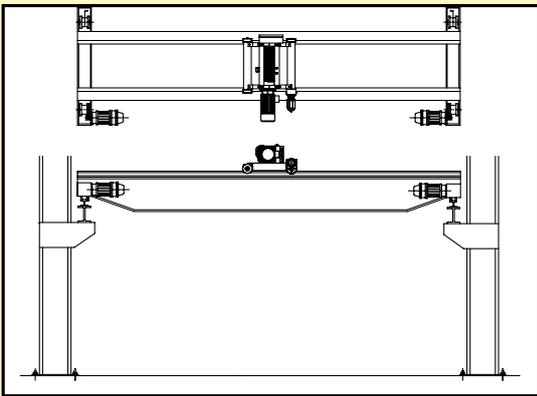

Application of hoists

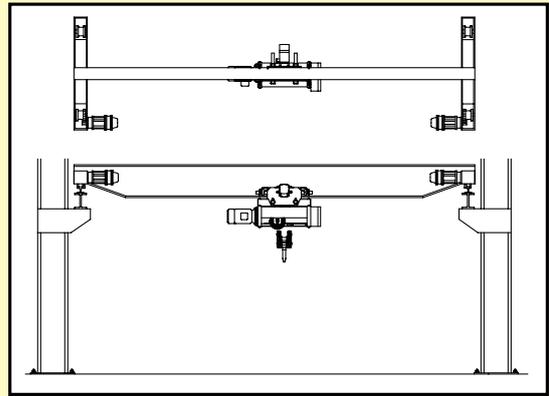

Gantry Crane

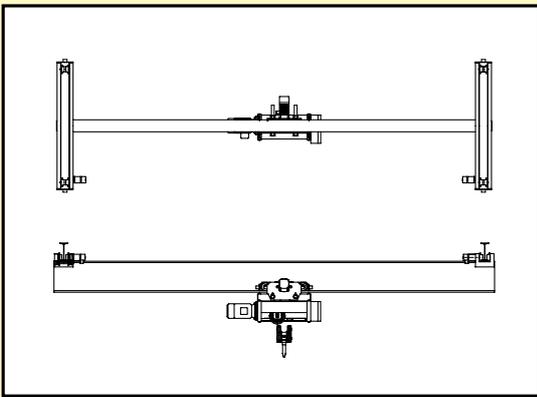

Semi-Gantry Crane

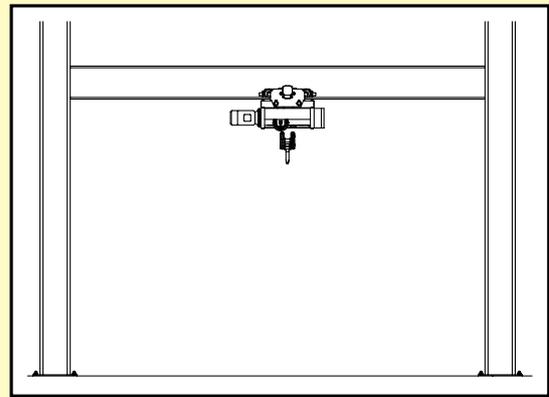

Double-Girder E.O.T. Crane

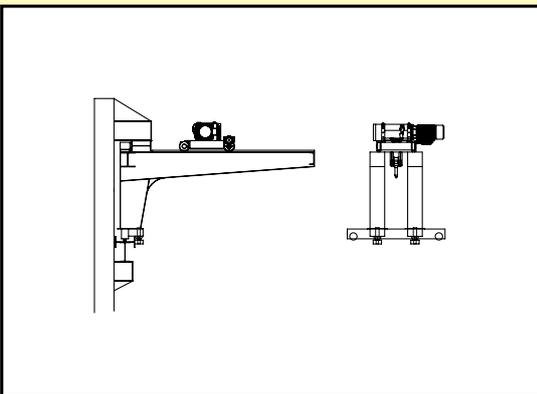

Single-Girder E.O.T. Crane

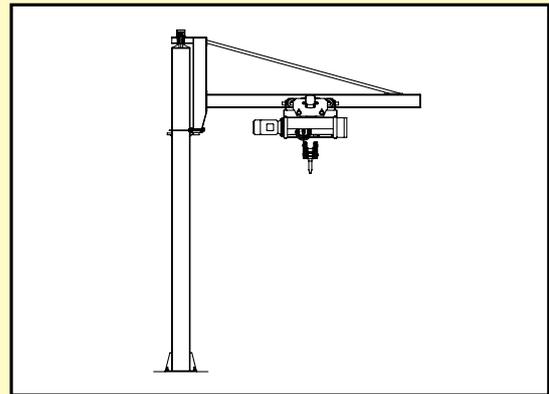

Underhung Crane
